

MOHIT KUMAR

Thali Bazar, Nawada, Bihar 805126 | +91 9471866129 | mohitkumar753119@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate with hands-on expertise in full-stack web technologies, desktop software development, and AI-accelerated engineering workflows. Adept at leveraging advanced AI prompt engineering to architect interactive client-side rendering engines, engineer offline-first applications, and integrate third-party messaging APIs using JavaScript (ES6+) and Python. Proven track record in rapid prototyping, algorithmic optimization, and delivering production-ready software solutions.

TECHNICAL SKILLS

AI & Prompt Engineering:	AI Prompting, Context Engineering, AI-Assisted System Architecture, Code Synthesis & Optimization, LLM Workflows
Programming Languages:	Python, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries:	Tkinter, HTML5 Canvas API, PyWhatKit
Core Competencies:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), State Management, Hit-Detection Algorithms, Offline Architecture
Tools & Environments:	Git, GitHub, VS Code, REST APIs, JSON

TECHNICAL PROJECTS

Xyronix – Interactive Infinite Canvas Engine	JavaScript (ES6+), HTML5 Canvas, AI-Assisted Architecture
- Engineered a high-performance browser-based infinite canvas workspace without external UI dependencies, utilizing generative AI prompting to rapidly scaffold mathematical coordinate systems and rendering loops. - Architected multi-level zooming, multi-directional panning, and bounding-box hit-detection algorithms for sub-pixel object precision. - Constructed proportional element resizing with strict aspect-ratio locking and an immutable state history stack for seamless undo/redo workflows. - Leveraged structured AI prompt iterations to develop dynamic vector styling via seeded pseudo-random algorithms for realistic, hand-drawn strokes. - Engineered responsive visual utilities including auto-fading laser pointer indicators, dynamic magic eraser, and rapid keyboard-driven diagramming macros.	
Quantum Ledger – Offline CRM & Automated Billing System	Python, Tkinter, PyWhatKit, AI-Driven Development
- Designed and deployed a desktop CRM and billing application using AI prompting and code synthesis to structure robust offline data schemas and fault-tolerant transaction logic. - Integrated automated WhatsApp messaging workflows via PyWhatKit to dispatch digital invoices, payment receipts, and real-time account statements. - Structured lightweight local database schemas guaranteeing transactional data integrity (ACID compliance) and zero-loss offline record handling. - Implemented an intuitive desktop GUI using Tkinter, accelerating daily transaction entries and customer query workflows by over 40%.	

EDUCATION

Diploma in Computer Science & Engineering	2023 – 2026
KPS Institute of Polytechnic Status: Completed	
Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Object-Oriented Programming, Computer Networks, Operating Systems, Web Development Fundamentals	
Higher Secondary Certificate (Class XII)	Completed
High School Sughrree, Bihar Aggregate: 63.2% (316/500)	

KEY STRENGTHS & LANGUAGES

Languages:	English (Professional Working Proficiency), Hindi (Native)
Key Attributes:	AI-Augmented Problem Solving, Analytical Thinking, Code Optimization, Agile Collaboration
